CORE COMPETENCIES

- Full Stack Development
- Client / Stakeholder Engagements
- Solutions Design & Development
- Software Development Lifecycle
- Agile & Scrum Methodologies
- Project Execution & Planning
- Team Building & Leadership
- Requirement Gathering & Analysis
- Front-end Design and Architecture
- UI Development & Optimization
- Technical Troubleshooting
- Capability Building & Trainings

SOFT SKILLS

Communication

Interpersonal Skills

Collaboration

Analytical

Problem-solving

Integrity

YOGESH SHARMA

PROFILE SUMMARY

- Possess nearly 3 years of comprehensive experience in software development, focusing on full-stack technologies in the IT sector, showcasing a deep knowledge of both **front-end and back-end development methodologies**.
- Functioning as a **Full Stack Developer at NCS Group**, orchestrating the design and execution of intricate applications while guaranteeing optimal performance and responsiveness across multiple platforms.
- Developed a comprehensive skill set encompassing **advanced programming languages, frameworks, and methodologies**, with a particular emphasis on Java, Spring Boot, and React.js, facilitating the delivery of robust software solutions.
- Expertise in **cloud infrastructure and DevOps methodologies**, utilizing tools like AWS and Docker to optimize deployment workflows and improve application scalability.
- **Successfully leveraged full-stack experience** to build interactive & user-centered software designs using Java; identified architectural improvements resulting in increased developer efficiency, product reliability & responsiveness to new feature requests.
- Track record of **effectively managing cross-functional teams & collaborating with stakeholders to achieve project objectives**.
- **Managed the entire Software Development Lifecycle (SDLC)** from requirement analysis, documentation (functional specifications & technical design), coding & testing to maintenance of applications in Production.
- Expertise in **Development, Build, Testing, Change, Deployment & Release Management** for large scale enterprise applications and products.
- **Proficient in the usage of Agile & Scrum methodologies** as well as database optimization & performance tuning of applications
- **Created a culture of innovation & continuous process improvement**, drove expanded system capability and leading-edge solutions development.

WORK EXPERIENCE

Mar'22 – Till Date: NCS Group Pune, Maharashtra
Full Stack Developer

Key Role:

- **End-to-End Application Development:** Designing, developing & maintaining both front-end & back-end of web applications; Ensuring seamless integration between the client-side and server-side technologies.
- **Front-End Development:** Building responsive and interactive user interfaces using HTML, CSS, JavaScript, and frameworks like React.js, Angular, or Vue.js.
- **Back-End Development:** Developing and managing server-side logic using programming languages such as Java, Python, Node.js, or Ruby.
- **Database Management:** Working with both SQL (MySQL, PostgreSQL) & NoSQL (MongoDB, Firebase) databases.
- **Version Control & Collaboration:** Using version control systems like Git for code management and collaborate on platforms like GitHub or GitLab.
- **Agile Methodologies:** Working in Agile environments, participating in sprint planning, daily stand-ups, and iterative development cycles.
- **Continuous Learning & Innovation:** Implementing new tools, practices, and solutions to improve development workflows and application performance.

SRI LANKAN GOVERNMENT - TAXATION PROJECT

- **Development Streamlining:** Implemented MVC and JDBC frameworks to streamline development processes, resulting in a **20% reduction in development time**. Integrated JUnit unit test configuration, which **boosted team collaboration by 30% and enhanced system performance by 25%, leading to a 15% increase in overall profitability**.
- **Backend Optimization:** Optimized the Java backend codebase using GIT version control, Confluence for documentation & Agile methodologies. **Achieved a 30% improvement** in API response times by implementing caching strategies and query optimizations, significantly enhancing system performance.

TECHNICAL SKILLS

- **Programming Language:** Java, JavaScript
- **Frameworks:** SpringBoot, React.js, React Native, Redux, Vue, Microservices, Next.js, Node.js
- **DevOps:** Docker, GIT, Jenkins, Cloud Infrastructure, Microsoft Azure, AWS, Spring Cloud, Kubernetes, Github
- **Database:** MySQL, PostgreSQL, MongoDB, NoSql
- **Tools:** CI/CD (Continuous Integration/Continuous Deployment), JIRA, Applicant Resiliency, GenAI
- **Other:** Data Structures and Algorithms, Object-Oriented Programming (OOP), CSS, HTML, Swagger

EDUCATION

- **2021:** B.Tech in Electric & Electronics
Lakshmi Narain College of Technology,
Bhopal Bhopal, Madhya Pradesh

- **Database Optimizations & Scalability:** Designed & implemented database optimizations and indexing strategies, ensuring seamless scalability to **accommodate a 40% increase in data volume**. Focused on interface design and front-end development using ES6, improving the overall user experience.
- **Cloud Integration & API Development:** Leveraged AWS Cloud services and Java Spring for serverless architecture, prioritizing automated testing in API development. Employed RESTful API design for enhanced system integration and performance. Additionally, streamlined front-end development using **React.js and Next.js** for improved user interface and faster load times.

TALENT ACQUISITION AUTOMATION PROJECT – SINGAPORE

- **Backend & Frontend Optimization:** Introduced pagination and lazy loading, **reducing backend load by 30% and improving frontend responsiveness by 25%**.
- **Enhanced Security and Access Control:** Implemented robust user and admin authentication, resulting in a **40% reduction in unauthorized access attempts**. Strengthened security measures and access control, leading to improved data protection and system integrity.
- **Real-Time Data Integration:** Integrated RESTful APIs and Storyboards, which **improved data retrieval speeds by 25%**, enabling real-time updates and providing a more interactive and dynamic user experience.
- **Technology Integration for Increased Efficiency:** Leveraged Apache Tomcat, Web Services, Node.js, Maven, and JavaScript to drive operational efficiency. This resulted in a **25% increase in placements and a 35% boost in revenue**. The automation of the talent acquisition process reduced hiring timelines by 40% and saved 30% in operational costs.

PROJECTS

SRI LANKAN GOVERNMENT - TAXATION PROJECT

- **Microservices Architecture:** Deployed a microservices architecture, RabbitMQ & Kafka, breaking down the application into smaller, manageable services. This improved scalability and maintainability, allowing for more flexible and efficient system management.
- **Service Discovery and Management:** Utilized Spring Cloud for service discovery and configuration management, and Netflix Eureka for service registry, ensuring seamless communication and dynamic scaling between services.

TALENT ACQUISITION AUTOMATION PROJECT - SINGAPORE

- **State Management with Redux:** Implemented Redux for efficient state management, ensuring smooth data flow and interaction within the application. This facilitated a more responsive and organized user experience.
- **CI/CD Pipeline Setup:** Established CI/CD pipelines using Jenkins, automating build, testing, and deployment processes. This approach significantly accelerated feature delivery while maintaining high reliability and consistency.

KEY ACHIEVEMENTS

- **Operational Efficiency Boost:** Played a key role in the development of a custom application that enhanced operational efficiency by 20% and reduced administrative overheads by 15%, significantly streamlining day-to-day operations.
- **Top-Performing Team Recognition:** Recognized as a top-performing team for consistently delivering multiple applications that improved operational efficiency by 30%. Led innovations in recruitment automation, staff management & integrated assistance tools.
- **NCS STAR AWARD Recognition:** Honored with the prestigious NCS STAR AWARD for leading the development of a transformative application that revolutionized the organization's recruitment process. This achievement resulted in a 40% reduction in time-to-hire and a 25% increase in candidate quality.
